

PLAINFIELD PUBLIC SCHOOLS

NON-RESIDENT ENROLLMENT AND ATTENDANCE

The Board of Education authorizes the Superintendent of Schools to approve request for student enrollment and attendance in the school district for children living outside the district under the following conditions:

1. When the district of origin (i.e. Sterling) agrees to pay the tuition for the student. The cost of tuition shall be based on the formula used in the contract with Sterling for high school students for that school year.
2. For a high school senior whose parents have moved out of the district during the school year provided that the student (or parent) provides the transportation.
3. For any student who has less than eight weeks of school year remaining and whose parents have moved out of the district. Transportation will be the responsibility of the family, however.
4. When a child is placed in the school district by an appropriate state agency, in which case it is determined that Plainfield is the NEXUS town.
5. For foreign exchange students residing in Plainfield when they are sponsored by a locally recognized foreign exchange program for students, in which case transportation is provided by the host community.
6. At such other times as may be deemed appropriate by action of the Plainfield Board of Education upon a written request from the interest party.

Permission shall be granted for non-resident students to attend the Plainfield Public Schools only when class enrollments in the district will permit the addition of the out of district student(s). In no case shall this policy cause the enrollment at a school in Plainfield and/or a class size within a school to be overcrowded. This circumstance will be determined by the Superintendent on behalf of the Board of Education in consultation with the building administrator(s).

As indicated above, transportation beyond that normally provided for students living in the district shall not be provided to non-resident students.
